

Press Release 16/2015

VdS-FireSafety Cologne: Registration for trade show exhibitors now available

The 4th VdS-FireSafety Cologne will take place on the 2nd and 3rd of December, and as usual in the Cologne Exhibition Centre. // A trade show for the industry and a meeting point for its members, combined with five of the renowned VdS conferences and two forums. // The opportunity is now available for interested exhibitors to secure exhibition space.

Cologne, 08. April 2015. Always in December, and always in the Rhineland - The VdS-FireSafety Cologne has established itself in just three years as an important date in the calendar of the industry, over 1,600 participants attended the event in 2014. Again in 2015 VdS presents the proven combination of a fire protection exhibition and trade fair, with conferences, various forums, attractive exhibition opportunities for companies and relevant contacts.

Also this year, the VdS team is inviting experts from around the world to Cologne. The VdS-FireSafety Cologne on the 2nd and 3rd of December combines this time the only fire protection trade fair in the Rhineland with the five well-known VdS conferences ("Fire Extinguishing Systems", "Fire Detection and Alarm Systems", "Smoke and Heat Exhaust Ventilation Systems", "Enduring Fire Protection of Existing Buildings" and the traditional two-day Development Seminar for fire Protection Manager). Exhibitors will meet both the numerous visitors as well as all of the participants of the VdS-FireSafety Cologne, they also have the opportunity to participate with presentations at the exhibitor forum.

"We are very excited about the recent success of our concept and expect in 2015 a new record amount of visitors," says Lars Braun, the organiser responsible for one of the industry's annual highlights, "with the proven combination of a conference with stimulus and product presentations from research and implementation, we are now the relevant forum for organisational and structural fire protection and most notably for fire protection using automatic systems" Interested companies can now register as an exhibitor at the trade fair.
